

Date	Event	Notes
October 2, 5:00-6:00 PM Pacific time	Friday Zoom call with Head of School, Christopher Barnes and Marissa Hildebrant, Health Director	This is an important time to learn further updates and to get questions answered about the details provided in this letter.
Now thru October 7	School activities and classes continue remotely.	
October 8-14	Teachers/advisors will assign independent school work. Although students will complete and submit assignments, they will not attend online class meetings.	This time will allow us to prepare the campus and to transition back to in-person learning (and to give the faculty a short break).
October 15-20	October break/vacation for seniors	We traditionally have a break in October. This year, the break allows us to switch from remote school to on-campus in-person school. Students will have a chance to re-charge before we dive in!
October 15-24	October break/vacation for new students	
October 15-26	October break for returning students	
October 7-21	Seniors and Faculty two-week self quarantine	<p>“Quasi”-Quarantine: we require that the entire community take two full weeks before their return date to “wash out” any potential infection. This measure will significantly decrease the risk of bringing any illness to campus by radically limiting potential exposure. In the next day or so, more detailed information and expectations will come from the Health Office. For now, simply plan to eliminate all “close-contacts” (15 or more minutes within six feet of anyone) starting on the dates listed below.</p> <p>Contact Tracing: Students should arrive on campus with a written list of all “close contacts” from the two weeks prior to their arrival. This list will be used only in the event of a positive test result indicating a need for contact tracing. “Close contact” is defined as more than</p>
October 10-24	New students two-week self-quarantine	
October 12-26	Returning students two-week self-quarantine	

		15 minutes at less than 6 feet spacing indoors or outdoors (with or without masks).
After October 15	Seniors get COVID-19 Test	For students to come to campus, they must have proof of a negative COVID-19 antigen type test within 7 days of their arrival on campus.
After October 18	New Students get COVID-19 Test	
After October 20	Returning Students get COVID-19 Test	
October 22	Seniors arrive after 12pm	The shift in dates is significantly influenced by available dates for on-campus community testing, which needs to happen within a recommended time window to maximize risk mitigation after students return. Please note that students must remain on campus from arrival until the winter break. Jill Brady , Assistant to the Head of School, has the task of coordinating all arrivals and will collect your travel plans. She is your point of contact for travel logistics (more details to come). Please respond promptly to all her requests for information. The campus will remain closed to visitors, including families, at least for the first three weeks after students arrive.
October 25	New Students arrive after 12pm	
October 27	Returning Students arrive after 12pm	
Early November	We will evaluate the feasibility of having a few weekends designated for parent visits.	Preference will go to new student families.
November 26	Thanksgiving	Unfortunately, there will be no large community celebration. Clearly, this is not a time to gather 500 people on campus for a meal. But don't worry--students and faculty will celebrate with turkey and all the fixings.
December 11	Winter holiday break begins	The first time students will leave campus to return home will be Friday, December 11 for the regular winter holiday break. They can leave campus as early as 8:30 am. We will announce the plans and schedule for the January return date in late November.
